

# The Next Generation in Tent Technology is here...

Introducing Breezeway™ - the latest in ventilation design technology, now available in selected OZtrail tents.

The Breezeway™ Window - new for 2009 - allows you to control your tent's exposure to the climatic Australian conditions. It offers flexibility, is easy to use and can be adjusted from inside or outside your tent. It even features its own awning, so you can leave the window open to enjoy fresh air when it's raining. All Breezeway™ tents feature an extra cross pole between the windows, which not only improves drainage from the rain, but increases the overall head height across the ceiling for extra room.

See OZtrail's entire tent range today at [www.oztrail.com.au](http://www.oztrail.com.au)

## Eco

Lightweight, affordable entry level tents that are quick and easy to erect. Ideal for a single or small group of campers.

## Outer Limits

High performance, lightweight tents with a compact carry size, designed for the serious hiker.

## Classic

An Aussie legend using tried and tested designs and materials. Available in almost every configuration imaginable.

## Elite

Sets the standard for space-efficient family tents. Designed for maximum internal space with a minimal footprint.

## Sportiva

The ultimate in fully featured family tents. The Sportiva range makes no compromises in quality or comfort.

## Canvas

Built tough for the serious Aussie explorer. Available in Tourer, Cabin and Camper Trailer styles.
